

The SideKick PowerPack provides "All Day" battery power for most major brands of laptop computers.

Never Run Out of Power

EarthWalk's eCharger™ and SideKick PowerPack™ is the ultimate laptop battery solution for your entire mobile lab. This universal battery solution is designed to provide "ALL DAY" operational power to a large group of laptop users via the mobile eCharger Caddy or the PowerStation Charging System that is a configuration option with the SmartCart and FlexCart Series of mobile computer labs. Spearheaded by the latest advancement in battery technology, some of which are utilized in the Hybrid automobile industry, the product developers at EarthWalk set out to create the premier portable power source for wireless mobile computer labs.

SideKick's advanced battery chemistry allows it to provide both longer laptop operational time and a longer battery life span. This 120-watt external power source can drive most any brand of laptop for up to 3 to 4 times longer than its original battery. The SideKick's usable life span is also more than twice that of the traditional Lithium-Ion batteries used in laptop computing.

The SideKick PowerPack provides enough power for ALL DAY use of your wireless laptops.

The SideKick PowerPack typically lasts up to 5 school years, saving the annual expense of replacing laptop batteries

The SideKick PowerPack works with most major brands of laptops.

SIDEKICK FEATURES/SPECIFICATIONS

SideKick Features

- Provides "All Day" battery power for most major laptop brands
- Fully recharges overnight
- 2-3 times the "capacity and lifespan" of standard Lithium-Ion laptop batteries
