CONFIGURATION OPTIONS

Charging Systems

Integrated AC Charging (model EXPR-32T-AC)

For budget-minded consumers, eXpress labs can be configured with 32 AC Outlets for use with each device's AC adapter and data/charge cables. System is configured with a 15 Amp circuit breaker. Use your devices' AC adapter and data/charge cables. Contact your EarthWalk solution specialist for details.

i-Charge integrated USB Charging System (model EXPR-32T-ICHRG)

Free up your devices' AC adapters to be used outside the system by selecting the USB i-Charge system. This system includes an integrated central power supply to provide a full 2.4 Amp of DC charging power to each device. The system can be specifically configured to support any 5-12V USB-charged device. Optional data/charge cables are also available—contact your EarthWalk solution specialist for details.

i-SYNC integrated USB Charge and SYNC System (model EXPR-32T-SYNC)

Select EarthWalk's i-Sync package and create the perfect charging and synchronizing solution for your iPads or USB tablet devices. The i-Sync features a high efficiency central power supply system with 32 full 2.4 Amp USB sync/charge ports. Contact your EarthWalk solution specialist to arrange for Pre-installed Micro-USB, 30-pin or Lightning data cables in each storage compartment to make iPad deployment and support super convenient.
